Subject: Thanks Dave - just to recap

Short Term (this week) - LiDAR and GRAIP lite potential opportunity. Dave C indicated that Dave P and Leigh will connect and then let Jayne know of if the current SOW in for EPA signature should change. At this point, HQ/WB wont sign the paper work until we hear from Jayne one way or the other.

Short Term (this week) - Potential availability of additional HQ watershed branch funds to support RA pilots. As discussed, HQ/WB is evaluating opportunities for using FY11 branch \$s to support TMDLs with increased focus on reasonable assurance(RA)/implementation readiness. WB identified the CZARA TMDLs as having a close enough link to the purpose of the dollars and want to know if the Region had a need for additional dollars to support CZARA TMDL development. WB is particularly interested in elements of TMDL development that support their implementation readiness. WB understands that the Region only used \$200K of the \$250K FY11 TMDL dedicated funds assigned for the CZARA TMDLs; hence, there may not be an immediate need for additional funds. However, the opportunity for additional funds exists. Dave C indicated that Jayne will contact WB this week to discuss the opportunity.

Mid Term (July) - Region 10 will schedule briefing/update for WB on overall strategy/approach for completing CZARA TMDLs in the next year. In addition to overall strategy, WB would like to initiate dialogue on what TMDL dedicated funding needs may be relevant for FY12.

Have a great trip Dave!
